

CANCER CARE

Lexington Medical Center fights cancer alongside its patients. The Foundation supports this care philosophy with cancer programs that help patients focus on their treatment and survivorship. These hospital- and community-based programs ensure patients can meet their basic needs, including access to critical medications and financial assistance with living expenses.

CANCER TRANSITIONS PROGRAM

Provides support programs to help cancer survivors transition from active treatment to post-treatment care

EXERCISE IS MEDICINE

Provides specialized training for individuals with cancer, chronic disease and diabetes, among other conditions

HOPE TEDDY BEARS

Provided to every newly diagnosed breast cancer patient since 1998 for comfort and encouragement

SUPPORTIVE CARE ITEMS

Provides mastectomy patients with a post-surgical bra, supplies and cosmetic bag

“I started the Exercise is Medicine program after I was diagnosed and treated for Hodgkin’s lymphoma. During cancer treatment, nothing is normal, but the Exercise is Medicine program helped me build an exercise routine that brought back something that felt normal.”
