# **Access Your COVID-19 Vaccine & Testing Verification**

LMC MyChart offers patients a verifiable QR code to share their COVID-19 vaccine and testing status. Only SMART Health Card applications recognize this verifiable electronic credential.

### **Flectronic Verification**

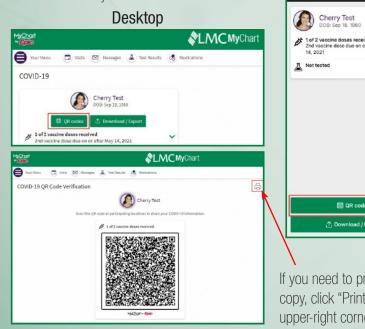

Patients can find their QR code in LMC MyChart under the "COVID-19" menu. If they have COVID-19 vaccine and testing information, patients will have two separate QR codes.

#### Mobile

If you need to print a paper copy, click "Print" icon in the upper-right corner.

## **Paper Verification**

Patients can ask for a printed paper copy of their QR code at discharge from any outpatient, emergency or inpatient visit.

## What Information is Available in the QR Code?

It includes the patient's legal name, date of birth and his or her COVID-19 vaccine or testing information. The QR code contains the same information as a printed vaccine or testing record, but it is more secure because this information is not in plain text.
